The Rise and Fall of Version Control and the Spider from Mars

# why git

- EXTRINSIC: we have been told so
- INTRINSIC: collaboration, what did I do

# why git

- EXTRINSIC: we have been told so
- INTRINSIC: collaboration, what did I do
- git won the version control war, probably
- git is complicated

# usual git workflow

- `git add FILE1 FILE2`
- `git commit -m "COMMIT MSG"`
- `git push -u origin master`

# usual git workflow

- `git add FILE1 FILE2`
- `git commit -m "COMMIT MSG"`
- `git push -u origin master`

Select this files

# usual git workflow

- `git add FILE1 FILE2`
- `git commit -m "COMMIT MSG"`
- `git push -u origin master`

Make checkpoint

# usual git workflow

- `git add FILE1 FILE2`
- `git commit -m "COMMIT MSG"`
- `git push -u origin master`
